Ethical use of Generative AI on Assignments

This is a guide on ethical use of generative AI tools for your assignments. As a MontCo student, it is essential to maintain academic integrity and uphold ethical standards in your work. This guide will help you navigate the responsible use of AI technology in your academic endeavors.

1. Understand the guidelines:
- ☐ Familiarize yourself with your instructors' policies and guidelines regarding academic integrity and the use of AI-generated content.
- ☐ Ensure that you are aware of what constitutes ethical behavior.

2. Own your work:
- ☐ Take pride in your assignments and strive to produce original work to the best of your ability.
- ☐ Remember that your education is about learning and developing your skills, not just about getting good grades.

3. Use AI responsibly:
- ☐ If you choose to use generative AI tools for assistance, use them as a tool to aid your understanding and learning process, not as a shortcut to avoid doing the work yourself.
- ☐ Use AI to **generate ideas** or **assist with research**, but always ensure that the final product reflects your own understanding and effort.

4. Cite sources properly:
- ☐ If you use AI-generated content, cite it properly, just like any other source.
- ☐ Give credit where it is due and acknowledge the assistance provided by AI tools.

5. Avoid plagiarism:
- ☐ Do not submit AI-generated content as your own without proper attribution.
- ☐ Plagiarism, whether intentional or unintentional, is a serious academic offense and can have severe consequences. Always ensure that your work is original and properly cited.

6. Be transparent:

- ☐ If you used AI tools to assist with your assignment, be transparent about it.
- ☐ Mention in your paper or presentation that you utilized AI-generated content and explain how it contributed to your work. This shows integrity and honesty in your academic endeavors.

7. Seek guidance if unsure:

- ☐ If you are unsure about whether your use of AI in an assignment is ethical, do not hesitate to seek guidance from your instructor.
- ☐ They can provide clarity on what is acceptable and help you make informed decisions.

8. Reflect on the learning process:

- ☐ Take time to reflect on how you used AI in your assignments and what you learned from the experience.
- ☐ Consider how AI tools can be used ethically and responsibly to enhance your learning and academic growth.

9. Stay informed:

- ☐ Keep yourself updated on developments in AI technology and its implications for education and academic integrity.
- ☐ Being aware of the latest advancements and ethical considerations will help you make informed decisions about the use of AI in your assignments.

10. Promote ethical practices:

- ☐ Encourage your peers to use AI responsibly and ethically in their academic work.
- ☐ By promoting a culture of integrity and honesty, you contribute to maintaining the credibility and value of education within your community college and beyond.
