

# TOP TIPS FOR CHEMISTRY SUCCESS

## MUST DO THESE THINGS:

- *Good attendance equals success*

## BEFORE CLASS begins:

- Familiarize yourself with material by visiting the following sites:
  - [thecrashcourse.com](http://thecrashcourse.com)
  - [www.khanacademy.org](http://www.khanacademy.org)
- Use library resources such as:
  - ✓ Borrowing laptops
  - ✓ Texts
  - ✓ Use of printers
- Learn to navigate your BlackBoard
  - ✓ Use tutoring for this if you need assistance

## DURING CLASS:

- ❖ Be familiar with study skills such as:
  - Notetaking  
You can take notes on lab top, and review later to ask questions and prepare for future test.
  - Time Management  
Helps you feel in control so that you have enough time to prepare and complete assignments
  - Explore Textbook  
Knowing how the text is organized will help you follow the lecture and take better notes. Be aware of features of the text to help you with dense information.
  - Utilize tutoring services for a brush up on notetaking, time management & how to utilize your textbook!

## AFTER CLASS:

- Read text & review notes after each class
- Do ALL practice problems
- Make use of Professor's office hours for questions/concerns
- Get into a study group to share & review material
- Work with tutors to help answer your questions
