

Study Plan for Success

1. **PREVIEW:** Preview lecture notes and/or text readings before class.
2. **LEARN:** Be engaged in class (sit up front, listen attentively, disable internet and put phone away)!
3. **REVIEW:**
 - Re-organize (not re-write!!!) notes and text material after lecture by using concept maps, outlines or charts.
 - Make flash cards for key terms.
 - Re-listen to lectures, if necessary!!
 - Meet with faculty to review your questions and/or study guides to ensure you grasp the concepts.
4. **ASSESS:**
 - Do practice questions for the content you just reviewed, while it's still fresh in your mind.
 - Meet with a study partner/tutor to critically review the concepts. Teach yourself/someone else the concepts to ensure you understand them!!
 - Repeat steps 1 through 4 for each content area before the exam.
5. **EVALUATE:** Evaluate your progress by thoughtfully reviewing your exam and the study process.
