COURSE DESCRIPTION:
Earth Science is a general survey course which includes the disciplines of Astronomy, Geology, Meteorology, and Oceanography. Specific topics to be examined include stellar evolution, planetary geology, cosmological theory, erosional and depositional processes, volcanoes, earthquakes, plate tectonics, weather patterns and forecasting. This course is recommended to fulfill a laboratory science requirement for non-science majors who do not have a strong science background. This course is subject to a course fee. Refer to http://mc3.edu/adm-fin-aid/paying/tuition/course-fees for current rates.

REQUISITES:
Previous Course Requirements
None

Concurrent Course Requirements
None

<td>--------------------------------------------------------------------------------------</td>
<td>---------------------------------------------</td>
</tr>
<tr>
<td>3. Recognize distinctions among the solar system constituents and account for their differences.</td>
<td>Text and Outside Readings Lecture Group and Individual Projects Lecture AV/Multimedia Materials</td>
<td>Group and Individual Project Reports Examinations Laboratory Reports</td>
</tr>
<tr>
<td>4. Relate the circumstances under which severe storms develop.</td>
<td>Text and Outside Readings Computer Simulation Online Datasets Lecture AV/Multimedia Materials</td>
<td>Group and Individual Project Reports Examinations</td>
</tr>
<tr>
<td>5. Recognize and apply the phase changes of water in the energy budget of meteorological systems.</td>
<td>Text and Outside Readings Computer Simulation Lab Procedures Group and Individual Projects AV/Multimedia Materials</td>
<td>Group and Individual Project Reports Laboratory Reports Examinations</td>
</tr>
<tr>
<td>6. Relate the primary factors responsible for climate zonation.</td>
<td>Text and Outside Readings Lab Procedures Computer Simulation Lecture AV/Multimedia Materials</td>
<td>Group and Individual Project Reports Laboratory Reports Examinations</td>
</tr>
<tr>
<td>7. Recognize important rock-forming minerals in the context of common crustal rocks.</td>
<td>Text and Outside Readings Lab Procedures Group and Individual Projects Lecture AV/Multimedia Materials Field Trips</td>
<td>Group and Individual Project Reports Laboratory Reports Examinations</td>
</tr>
<tr>
<td>8. Recognize landforms associated with erosional and depositional processes.</td>
<td>Text and Outside Readings Lab Procedures Group and Individual Projects Lecture AV/Multimedia Materials Field Trips</td>
<td>Laboratory Reports Examinations</td>
</tr>

LEARNING OUTCOMES | LEARNING ACTIVITIES | EVALUATION METHODS
---|---|---
9. Describe the energetics of volcanic activity. | Lecture Text and Outside Readings Group and Individual Projects AV/Multimedia Materials | Laboratory Reports Group and Individual Project Reports Examinations

10. Relate the evidence for the plate tectonic model. | Lecture Text and Outside Readings Lab Procedures Online Datasets Group and Individual Projects AV/Multimedia Materials | Group and Individual Project Reports Laboratory Reports Examinations

At the conclusion of each semester/session, assessment of the learning outcomes will be completed by course faculty using the listed evaluation method(s). Aggregated results will be submitted to the Associate Vice President of Academic Affairs. The benchmark for each learning outcome is that *70% of students will meet or exceed outcome criteria.*

SEQUENCE OF TOPICS:
1. Introductory Material
   a. Scientific Method
   b. Parameters and Units
   c. Atomic Structure
   d. Electromagnetic Energy
2. Topics of Astronomy
   a. Characteristics and Parameters of Stars
      1) Distance
      2) Spectroscopy
      3) Motion studies
      4) Stellar classification
   b. Stellar Evolution
   c. Galaxies and Quasars
   d. Cosmology
   e. Solar System
   f. Lunar Geology
   g. Astronomic Phenomena
      1) Phases
      2) Eclipses
      3) Tides
      4) Seasons
3. Topics of Meteorology
   a. Composition, Structure, and Evolution of Atmosphere
   b. Mechanisms of Heat Transfer In Atmosphere
   c. Water
      1) Capacity/saturation
      2) Phase changes
   d. Pressure and Wind
   e. Mid-Latitude Cyclones
   f. Severe Storms

4. Topics of Geology
   a. Common Rock-Forming Silicates
   b. Weathering
   c. Mechanisms, Processes, and Environments of Erosion/Transportation/Deposition
      1) Landslides
      2) Streams
      3) Coastlines
      4) Carbonate deposition
      5) Deep-ocean sedimentation
   d. Lithification, and Interpretation of Sedimentary Rocks
   e. Igneous Rocks and Igneous Processes
   f. Metamorphic Rocks
   g. Crustal Deformation
   h. Plate Tectonics
   i. Geologic Time

LIST OF LABORATORIES -- to be selected by the instructor. Others may be added at the discretion of the instructor:

1. Density Determination and Interpretation
2. Relative and Absolute Dating Lab
3. Observations with Telescopes
4. Humidity – Data Collection and Interpretation
5. Weather Maps – Construction and Interpretation
6. Soil Analysis
7. Stream Modeling with Stream Table
8. Topographic Maps – General Introduction; and Interpretation of Streams, Glaciers, Coastal Processes
9. Common Rock-Forming Silicates and Non-silicates
10. Sedimentary Rocks – Identification and Interpretation
11. Igneous Rocks – Identification and Interpretation
12. Metamorphic Rocks – Identification and Interpretation
13. Interpretation of Earthquake Data; Earthquakes and Earth's Interior
14. Plate Tectonics
15. Crustal Structure – Folds and Faults
16. Mineral Properties & Identification
17. Shaping Earth's Surface -- Running Water & Groundwater
18. Waves, Currents, & Tides
19. Field Observations
20. Air Masses
21. The Moon and Sun

FIELD TRIPS:
Field trips may be scheduled as part of class time and/or on Saturday.

LEARNING MATERIALS:
Supplementary Handouts
College Computer Network
Tutorial Services

Other learning materials may be required and made available directly to the student
and/or via the College's Libraries and/or course management system.

COURSE APPROVAL:
Prepared by: Robert Kuhlman, Professor of Earth Science  Date: 10/28/2004
Revised by: Robert Kuhlman, Professor of Earth Science  Date: 2/10/2009
VPAA/Provost Compliance Verification: Dr. John C. Flynn, Jr.  Date: 9/11/2009

Revised by: Robert Kuhlman, Professor of Geology  Date: 6/2012
Revised by: Robert Kuhlman, Professor of Geology  Date: 8/2013
VPAA/Provost or designee Compliance Verification:
Victoria L. Bastecki-Perez, Ed.D.  Date: 9/5/2013

Revised by: Debbie Dalrymple  Date: 6/27/2016
VPAA/Provost or designee Compliance Verification:

Revised by: Debbie Dalrymple and Evon Martins  Date: 1/11/2018
VPAA/Provost or designee Compliance Verification:  Date: 1/30/2018

*This course is consistent with Montgomery County Community College's mission. It was developed, approved and will be delivered in full compliance with the policies and procedures established by the College.*
